As Editor-in-chief I would like to thank all of our editors and reviewers for their continued support of the *Veterinary Evidence* journal and their diligence in meeting demanding timelines. Their knowledge, expertise and insights are duly acknowledged and highly valued. All reviewers who have taken the time to review for *Veterinary Evidence* are listed in the full text.

In the coming year we hope to develop a new approach and construct for the recognition and delivery of important information needs. This will take the form of a condition specific decision support algorithm with links to Knowledge Summaries providing the best current evidence. We also intend to publish a series of papers from targeted invited authors to highlight important areas of evidence-based practice including patient safety, quality improvement, business and workplace learning. We have also launched a Knowledge Summary competition for students studying veterinary medicine, veterinary nursing and veterinary bio-science, so that we may engage with the next generation of practice professionals.

I look forward to a challenging and innovative new year with your continued support.

Thank you to all who have contributed.
