Erratum published: 05 May 2023

Original paper published: 02 Dec 2022

The original article was published in *Veterinary Evidence* Vol 7, Issue 4 (2022): <https://doi.org/10.18849/ve.v7i4.608>

## Erratum

Unfortunately the original version of the article was missing the following statement.

This Knowledge Summary has reviewed the available evidence on the use of a SGAD (v-gel®) in rabbit anaesthesia. Since writing a new design of a single use supraglottic airway device (SGAD) has been introduced; currently there is no published evidence on whether this new device has an impact on the risk of injury.

This error was in both the HTML and PDF versions. This has now been updated in both the HTML and PDF versions, and can be found in the clinical bottom line and the evidence section.

## Contribute to the evidence

There are two main ways you can contribute to the evidence base while also enhancing your CPD:

- Tell us your information need
- Write a Knowledge Summary

Either way, you will be helping to add to the evidence base, and strengthen the decisions that veterinary professionals around the world make to give animals the best possible care.
